Commented [MP9]: Centre, 14pt , SURNAME in Capitalize case, Other names in Sentence case separated with a comma

MATRICULATION NUMBER OF THE STUDENT

Commented [MP10]: Centre, Bold, 14pt

**PROJECT SUBMITTED TO THE DEPARTMENT OF COMPUTER
SCIENCE, SCHOOL OF INFORMATION AND COMMUNICATION
TECHNOLOGY, FEDERAL UNIVERSITY OF TECHNOLOGY, MINNA,
NIGERIA IN PARTIAL FULFILLMENT OF THE REQUIREMENT FOR
THE AWARD OF THE DEGREE OF BACHELOR OF TECHNOLOGY IN
COMPUTER SCIENCE**

Commented [MP11]: Reserved words, Capitalize case, Bold, Centre, Line spacing 1.15, 14pt

MONTH, YEAR

Commented [MP12]: Capitalize case, Centre, 14pt

DECLARATION

I hereby declare that this project titled: ...”Title of Project”... is a collection of my original project work and it has not been presented for any other qualification anywhere. Information from other sources (published or unpublished) has been duly acknowledged.

Commented [MP13]: Centre, Capitalize case, Bold, 14pt

Commented [MP14]: Reserved words, Justify right & left, Line spacing 2.0, 12pt

SURNAME, OtherNames

Matriculation Number
Federal University of Technology,
Minna, Nigeria.

Signature and Date

Commented [MP15]: SURNAME in Capitalize case, Other names in Sentence case separated with a comma, 12pt

Commented [MP16]: No line spacing, 12pt

CERTIFICATION

The project titled: ...”Title of Project”... by: ...SURNAME, OtherNames..., (Registration Number), meets the regulations governing the award of the degree of Bachelor of Technology in Computer Science of the Federal University of Technology, Minna.

Your Supervisor’s Name

Project Supervisor

Signature and Date

Dr. (Mrs) O.A Abisoye

Head of Department

Signature and Date

External Examiner

Signature and Date

Commented [MP17]: Centre, Capitalize case, Bold, 14pt

Commented [MP18]: Reserved words, Justify right & left, Line spacing 2.0, 12pt

Commented [MP19]: Preferably, Initialize first and middle names, and write last name in full

DEDICATION

Commented [MP20]: Centre, Capitalize case, Bold, 14pt

ACKNOWLEDGEMENTS

In your acknowledgement, include your supervisor, HOD and all academic and non-academic staff of the department

Commented [MP21]: Centre, Capitalize case, Bold, 14pt. The word ACKNOWLEDGEMENT should have an 'S'

Commented [MP22]: Justify right & left, Line spacing 2.0, 12pt

ABSTRACT

Abstract is a one paragraph summary of the whole study containing a brief introduction of the subject area, statement of problem, methods used, data analysis, your results or/and findings, and conclusions drawn. It should not be more than 150 – 250 words. It must be single-spaced, and must not be italicized.

Commented [MP23]: Centre, Capitalize case, Bold, 14pt

Commented [MP24]: Justify right & left, Single line spacing 1.0, 12pt

TABLE OF CONTENTS

1.0

INTRODUCTION

Commented [MP40]: Centre, Capitalize case, Bold, 14pt

1.1 Background to the Study

Commented [MP41]: Sentence case, Bold, 12pt

A project background study is a comprehensive review of information surrounding and influencing your topic. It is a review of the elements connected to your topic. Generally, it contains current information surrounding the issue, previous studies on the issue, and relevant history on the issue. Ideally, the study should effectively set forth the history and background information on your project problem. The purpose of a background study is to help you to prove the relevance of your project objectives and to further develop your report. The section creates readers' interest in your topic.

Commented [MP42]: Justify right & left, Line spacing 2.0, 12pt

1.2 Motivation of Study

Commented [MP43]: Sentence case, Bold, 12pt

In this section, you must state why the subject area is interesting and worth exploring. Often, you support your argument with relevant statistical data. It could also highlight the scope of current problems in the subject area.

Commented [MP44]: Justify right & left, Line spacing 2.0, 12pt

1.3 Statement of Problem

Commented [MP45]: Sentence case, Bold, 12pt

This statement of the problem is usually a declarative statement defining your intention and brings your work into focus. It clarifies, outlines, and limits the problem area. Thus, it must be good, clear, and concise.

Commented [MP46]: Justify right & left, Line spacing 2.0, 12pt

1.4 Aim and Objectives of Study

This section presents what the project hopes to achieve. The aim is the general objective of the study. On the other hand, the objectives are often specific objectives to be achieved; the attainment of which implies that you have achieved the general objective.

Commented [MP47]: Sentence case, Bold, 12pt

Commented [MP48]: Justify right & left, Line spacing 2.0, 12pt

It is expected that your aim and objectives are SMART:

S – Specific

M – Measurable

A – Achievable

R – Realistic

T – Time bound

1.5 Significance of Study

In this section, you outline the benefits of the study in terms of its implications or possible applications. It contains WHO benefits and for each, WHAT is benefited. Essentially, you focus on the benefits of the study and not the research problem. You can place yourself in the position of responding to someone who says, “So what?”

Commented [MP49]: Sentence case, Bold, 12pt

Another technique used in determining the significance of study is providing a persuasive rationale for your argument by answering the following questions:

- i. Why is my study important?
- ii. To whom is it important?
- iii. What can happen to society, theory, or program if the study is done or not done?

Commented [MP50]: Justify right & left, Line spacing 2.0, 12pt

1.6 Scope and Limitation of Study

It is not possible to include ALL aspects of a problem. In this section, you highlight the boundaries of your research. It explains the data, activity, process included in your work, and those not included.

Commented [MP51]: Sentence case, Bold, 12pt

Commented [MP52]: Justify right & left, Line spacing 2.0, 12pt

1.7 Organization of Study

Here, a description of how your entire project work is organized is given. Often, you describe in short details what each chapter talks about in a single paragraph.

Commented [MP53]: Sentence case, Bold, 12pt

Commented [MP54]: Justify right & left, Line spacing 2.0, 12pt

1.8 Definition of Terms

Here, define all word and phrases used in the project. Also abbreviations used shall be stated in full at first mention with the abbreviated terms in bracket and subsequently the abbreviation may be used.

Commented [MP55]: Sentence case, Bold, 12pt

CHAPTER TWO

Commented [MP56]: Centre, Capitalize case, Bold, 14pt

2.0 LITERATURE REVIEW

Commented [MP57]: Centre, Capitalize case, Bold, 14pt

This is a documentation of the related works done by others, its merits and limitations, i.e., critical analysis of reported research on the problem or topic under review. The review may be placed under sub-headings for clarity and more critical analysis. In principle, this section should provide an account of project works done by others on the topic. Implicitly, it has to be a critique of the previous research results. It should NOT be less than 15 pages, and 20 pages for implementation based and research based projects respectively.

Commented [MP58]: Justify right & left, Line spacing 2.0, 12pt

CHAPTER THREE

Commented [MP59]: Centre, Capitalize case, Bold, 14pt

3.0 RESEARCH METHODOLOGY /SYSTEM ANALYSIS AND DESIGN

Commented [MP60]: Centre, Capitalize case, Bold, 14pt

This chapter is the most important part of your project document because it provides the essential information that allows the reader to judge the validity of the results and conclusions of the study reported. This section tells your reader 'how' you carried out the project that was needed to answer your project questions. It must be able to explain:

- i. **WHEN** the study was carried out
- ii. **WHERE** the study was carried out
- iii. **WHAT** materials, techniques, samples, data, approaches, theoretical frameworks were used in the study, and
- iv. **HOW** the study was carried out , or
- v. **WHAT** procedures were used.

Commented [MP61]: Justify right & left, Line spacing 2.0, 12pt

CHAPTER FOUR

4.0 RESULTS AND DISCUSSION/ SYSTEM IMPLEMENTATION AND TESTING

In this section, your results are presented for research based project, and screenshots for implementation based project. Each result is expected to be extensively discussed.

Commented [MP62]: Centre, Capitalize case, Bold, 14pt

Commented [MP63]: Centre, Capitalize case, Bold, 14pt

Commented [MP64]: Justify right & left, Line spacing 2.0, 12pt

CHAPTER FIVE

Commented [MP65]: Centre, Capitalize case, Bold, 14pt

5.0 SUMMARY, CONCLUSION, AND RECOMMENDATIONS

Commented [MP66]: Centre, Capitalize case, Bold, 14pt

5.1 Summary

Restatement of the problem, and description of procedures used.

5.2 Conclusion

Conclude your objectives achieved

5.3 Recommendations

Give recommendations arising from the study.

Give suggestions for further studies.

2.0 FORMATTING OF PROJECT

2.1 *Language and Style*

The project must be written in English Language.

2.1.1 Use U.K. English – It is recommended that U.K. English be used since most of the institutions in Nigeria use this medium as their standard language of written communication. Set your computer to U.K. English as default because Microsoft Word has U.S. English as its default language. (Go to *Tools, Language, set default*)

There are many words that are spelt differently in the U.S. e.g.

- (i) program (U.S.), programme (U.K.)
- (ii) center (U.S.), centre (U.K.)
- (iii) color (U.S.), colour (U.K.)

If your computer is set at U.K. English, then any word spelt using U.S. English will be underlined in red and the correct spelling will be provided under spell check.

2.1.2 Formal Language – A standard project should not contain any colloquial language.

E.g. (i) “and so on” or “etc.” – You are expected to list or state everything.

(ii) “haven’t or isn’t” – Write in full “have not, is not”

(iii) Any word that is from another language should be written in italics and explained under definition of terms (except for scientific names which need not be explained).

2.1.3 Write in full – Always write names of organizations and institutions in full with abbreviation in brackets before subsequently using abbreviation alone. e.g.

- (i) World Health Organization (WHO)
- (ii) Federal Capital Development Authority (FCDA)
- (iii) Federal University of Technology (FUT)

2.1.4 Avoid using personal pronouns – The purpose of the project is to present the project rather than the personality of the author therefore the tone or the language should be impersonal. First person pronouns are never used e.g.

- (i) “I carried out case studies at Lagos. “Rather use reported speech, “Case studies were carried out at Lagos.”
- (ii) “It is my opinion that,” rather, “It is the opinion of the author that,”

2.1.5 Use capital letters for proper names of people, places and organizations e.g.

- (i) Peter and Adamu
- (ii) Ibadan and Enugu
- (iii) Central Bank of Nigeria

2.1.6 Check spellings and grammar – Keep a dictionary at hand to check spellings and meanings of words that you are not sure of. Microsoft Word will underline incorrect or unknown spellings in red and incorrect grammar in green. Do a spell check and grammar check and effect corrections.

- (i) Care should be taken to make the project a scholarly contribution to knowledge, including language usage and accuracy of expression. A research project must be accurate, and its language must be precise.
- (ii) Proper attention should be paid to such skills as correct spelling, punctuation, sentence structure, capitalization and the proper use of italics. Students are advised to consult a good handbook on language usage, a dictionary, and manual styles for further details.

2.2 *Typing Instructions*

- (a) Size: Use A4 paper (21.0x29.7cm)
- (b) Typing: The following points should be noted:
 - (i) Type on one side only using Microsoft Word and Times New Romans.
 - (ii) For the main body of the Project use font size twelve (12). Chapter number and title use size fourteen (14), other headings and subheadings use font size twelve (12)
 - (iii) Use double spacing (2.0) throughout, except for abstract (single spacing 1.0), the indented quotations and footnotes which should be typed in single spacing.
 - (iv) Use Block Paragraphing i.e Leave one extra line space between paragraphs
 - (v) Provide adequate margins - 3.5cm on left hand side margin, 2.5cm on top, bottom and right hand side margins.
 - (vi) Try not to break words at end of lines. Use the same character (font type) to ensure uniformity throughout the text.
 - (vii) Avoid a single sentence paragraph.
- (c) Quotations: Quotations that are fewer than fifty words may be integrated into the text using double quotation marks at the beginning and end of quotation. For a

quotation within a quotation use single quotation marks (e.g. “double ‘single’ doubled”). For quotations of over fifty words indent in typescript 1.5cm from left hand margin. No quotation marks are necessary for indented passages.

2.3 Tables, Figures and Plates

(a) Tables

- i. Tables should be constructed such that they could be read and understood without references to the text of the project. A table should therefore be simple, presenting only one general kind of data or relationship. A good table should contribute to the processes of analysis and valid generalization of findings inherent in the original data.
- ii. Table within should be brief and clear. Very long tables should normally be inserted in the appendix at the end of the project.
- iii. Each table should have a clear and self explanatory title. Tables should be numbered consecutively with Arabic numeral that conforms with the chapter throughout the project. e.g. for chapter four Tables 4.1, table 4.2, table 4.3 etc. The title of the table shall be un-bold and on top of the table close to the body of the table. The content of the table shall be centralized.
- iv. The text should include useful reference to all tables. For larger tables, use landscape - type length-wise along the page. Orientation should be such that captions are at the free end of the copy and the character of the table content should not be less than 10 font size.
- v. Tables should be formatted with grid lines.

(b) Figures and Plates

- i. Figures include graphs, charts, drawings, diagrams, maps, and computer print-outs. The term ‘Figure’ thus refers to any type of graphic illustration other than a table. Figures should be clear, elegant and simple to interpret. Arabic numerals should be used in numbering figures with reference to the chapter e.g Figure 4.7. Write Figure in full when referencing within texts.
- ii. Mounted illustrations such as photographs are usually referred to as PLATES. The recommended practice is to use roman numerals to identify plates e.g. Plate III, Plate V.
- iii. Each figure or plate must have a concise but comprehensive caption. Avoid the use of such superfluous phrases as “Graph showing.....” or map illustrating.... Large figures may either be neatly folded or photographically

reduced to the required size. If the system of folding is selected, a large figure should be so folded as to facilitate ease of reference to it. Using photographic reduction may cause distortion of relationships hence all maps should carry linear scale. The titles for figures and plates shall be below them and should be centralized.

(c) ***Numbers and Dates***

- (i) In descriptive text numbers are usually written in words if under 10, except when they denote a unit of measurement. All other numbers should appear in Arabic numerals. Insert comma in numerals over 1,000 or space out as recommended by the S.I. System of Units. Use 'first' 'second' not '1st, 2nd'.
- (ii) Dates should take the form 10th March, 1995. Decades should be referred to without the apostrophe e.g 1990s, 1950s, 1970s.
- (iii) If you choose to use percentage sign (%) do not mix with spelt out figures or vice versa.
- (iv) Unit of measurements should be spelt out when appearing alone in the text, but abbreviated according to standard abbreviations when used in tables and figures and when qualified by numbers.
- (v) Metric Units should be used.

(d) ***Level of List***

First level lists use alphabets (a), except for outlining project objectives which should be roman numerals (i). Sub/second level list use roman numerals (i), Avoid third level of list, use subheadings to avoid running into multiple level of list

2.4 References (In-text citation and Reference list)

- Use APA 7th edition reference style:
- Reference list shouldn't be less than 15 for implementation based projects, and 20 for research based project. 70% of the reference list should be RECENT (i.e. within the last five years)

2.5 Minimum project document pages

- The acceptable minimum project document pages should NOT be less than **50 pages** (i.e. Chapter 1- Chapter 5)

APPENDIX

In the appendix, include any additional information such as: source code, raw data, interview/questionnaire transcripts and other information that are relevant but too long or too detailed to include in the main body of your work.
